DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/17/2010 has been entered.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 3731

3. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

4. Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1 and 62 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 22 of U.S. Patent No. 7,691,137. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the claims listed above require a catheter with a balloon and a rotatable sheath that surrounds the balloon where the balloon can rotate relative to the balloon while it is longitudinally fixed relative to the balloon at least in the unexpanded state.

Allowable Subject Matter

6. Claims 1 and 62 are in condition for allowance with the exception of the obviousness double patenting rejection set forth above. By extension, the dependent claims that depend from claims 1 and 62 will be in condition for allowance when the obviousness double patenting rejection is obviated.

Art Unit: 3731

7. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to disclose or suggest a sheath that is rotatable about and in contact with a balloon where the sheath is also longitudinally fixed relative to the balloon. The prior art shows sheaths that are capable of rotation about a balloon but not longitudinally fixed (for example, Cox 5,257,974 and Stone et al. 5,843,027) and sheaths that are longitudinally fixed but not rotatable (for example, Hillstead 5,116,318). However, combining Hillstead with either Cox or Stone et al. would not be obvious because the combination would destroy the desired traits of each of the references, thus making them unsuitable for their intended purpose.
